CAR LIFT

Mégalift car lift

Based on the Mégalift concept, the Sodimas car lift fits into residential buildings, offices, public car parks and any building where a ramp is not possible. It is designed as everyday equipment, reliable in the building's flow of vehicles in and out.

Key strengths

Space saving

No ramp to build: the freed area can host parking spaces.

Electric or hydraulic

Electric traction, 2:1, 3:1 or 4:1 roping for long travel; hydraulic for short travel.

Re-levelling

Automatic re-levelling in both directions while vehicles drive in and out.

Robust

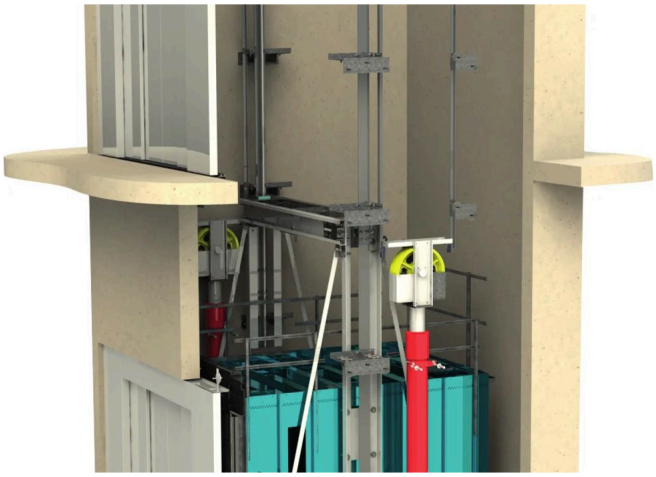

Bolted folded sheet metal and factory pre-assembly, like the whole Mégalift range.

Harsh environments

Suited to the cold, humid or dusty conditions of car parks.

Bespoke

Load, dimensions and finishes adapted to your building.

CAR LIFT

Specifications

Load	3,000 kg
Speed	0.5 m/s maximum
Car	2,500 × 5,320 mm (5,420 mm over sills)
Car height	2,000, 2,100 or 2,200 mm
Min. shaft width, hydraulic	3,500 mm with 2,400 CO · 3,550 mm with 2,500 CO
Min. shaft width, electric	3,650 mm with 2,400 CO · 3,700 mm with 2,500 CO
Shaft depth	5,820 mm, doors at landings
Pit	1,400 mm minimum
Headroom	Car height + 1,600 mm
Drive	Hydraulic or electric, with machine room
Re-levelling	Automatic in both directions

Sodimas manufacturer data. Photos non-binding. For any other load, speed or dimension, please contact us.

What we need to study your project

Vehicle type, number of floors, travel, frequency of use and the dimensions available for the shaft.
