Head office: Gex, France

euro-lift.fr

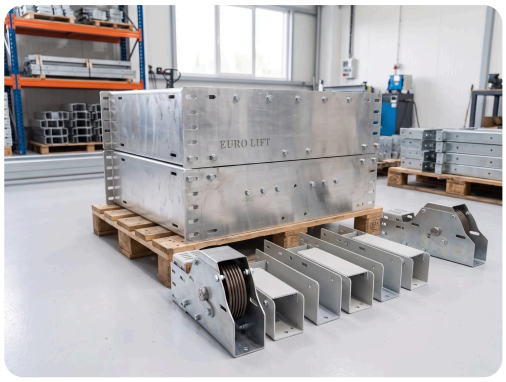

ABOUT US

A company of lift specialists

EUROLIFT Ascenseurs is a French company registered for the manufacture of lifts, goods lifts and escalators. Its head office is in Gex, in the Ain department.

It was founded by its president, Yacine Moussadek Kaidi. Trained in lift repair through an apprenticeship with OTIS, he has more than fifteen years of experience in lift design, installation and maintenance.

You hand us your project; we see it through to the end. Bespoke design, manufacturing, packing, export documents, transport and tracking to your site, then installation by your own teams, the partner of your choice or our international network of installers.

WHAT WE DO

Five floors of expertise

Design

Shaft survey, choice of drive, performance and finishes: every lift is sized for your building.

Complete lifts for export

Machine-room-less and machine-room lifts, goods lifts and escalators, packed and shipped with all export documents.

Cabins & finishes

Six cabin models, dozens of finishes, a choice of car and landing operating panels.

Spare parts

Controller boards, drives, brakes, governors, displays: original parts shipped within France and abroad.

Projects in France

Study, supply and installation of lifts for housing, offices and public buildings.

FROM A TO Z

One contact, from drawing to commissioning

01 **Bespoke design**
Your project starts with a drawing: your shaft, your floors, your use. Every lift is sized for your building.

02 **Component selection**
The best components, selected to meet your project's requirements, for better value for money.

03 **Preparation**
All your lift's components are prepared and packed in export crates, protected for a long, safe and damage-free journey.

04 **Loading**
Optimised loading to ship as many components as possible, in individual crates or in one or more containers.

05 **Transport**
To your destination, anywhere in the world, by road, by sea or both.

06 **Tracking**
Every stage of the journey is tracked daily, until your goods arrive.

07 **At sea**
Your equipment is on its way to Europe, Africa or the Middle East, with all documents ready for customs clearance on arrival.

08 **Delivery**
We support you: everything is arranged for a safe delivery, as quickly as possible.

09 **Reception**
You receive your equipment on site, complete and checked, before installation.

10 **Installation**
By your own teams, by the partner of your choice, or by our international network of installers.

11 **Commissioning**
Tests and adjustments: the lift is ready.

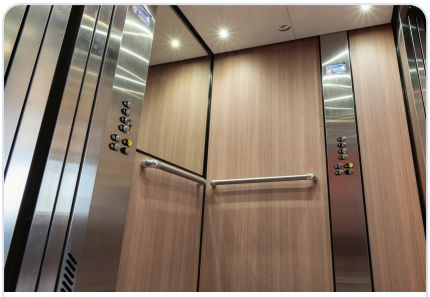

12 **Everyday use**
For the people who ride it every day.

13 **Your project**
What if the next floor were yours?

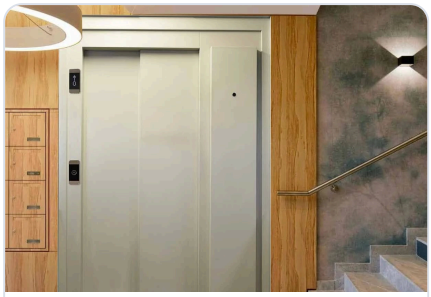

SODIMAS · EDEL

Our lift ranges

Médium 2.5 range

A machine-room-less lift designed for buildings short on space: pit reduced to 300 mm and top floor at 2,500 mm, on a single load-bearing…

ALPHA Motion

Two loads, predefined dimensions and simplified installation: Sodimas' standard residential lift, for new and existing…

SweetLIFT home lift

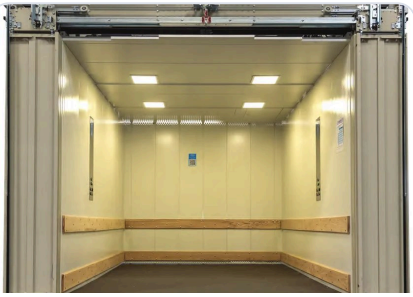

A home lift designed in France by Sodimas for houses and villas: it fits without major works, with a 10 cm pit, and can be fully…

EXPORT ONLY

HYBRID

Simple, robust mechanics combined with QI Touch electronics: the best-value Sodimas lift for volume projects, with or without a machine…

Mégalift goods lift

For heavy loads and large volumes: a range of goods lifts designed like a machine tool, electric or…

Car lift

Vertical transport of the vehicle with its driver and passengers, where space does not allow an access…

Sodimas technology, a French manufacturer

EUROLIFT relies on Sodimas for the drive, the controller and the safety components. The components of our lifts are designed and manufactured in Europe.

QI Touch · Controller

Multitasking system, CAN bus communication, Quick Install wiring and guided commissioning. Compliant with EN 81-20 and EN 81-50, ready for connected monitoring.

LIMAX · Absolute positioning

A sensor on the car roof and a coded magnetic tape in the shaft: the car position is always known, stops are accurate and the shaft has fewer parts.

Gearless · Drive

Gearless motor for lower noise and energy use, or a quiet geared machine when the building has a machine room.

INTERNATIONAL

Your lift project, worldwide

Developers, construction companies, installers: we support you from design to commissioning, in Europe, Africa and the Middle East, with a contact who speaks your language.

Bespoke design

Study of your drawings and shaft, choice of machine, performance and finishes for your building.

Sodimas and Edel

Equipment from our partners Sodimas (France) and Edel (Spain), chosen and combined to suit your project, budget and lead times, then consolidated in Europe before shipping.

Packing and export documents

Export crates, optimised container loading, invoice, packing list, certificate of conformity and bank documents when needed.

Tracked shipping

By road, sea or both, tracked at every step to the port or to your site.

Installation

By your teams, by the partner of your choice or by our international network of installers.

Spare parts

Original parts shipped anywhere, for new lifts as well as maintenance.

Your project, step by step

01 **Study**
Review of your drawings and needs, advice on the equipment.

02 **Offer**
Detailed offer and proforma invoice.

03 **Manufacturing**
Made to measure, components consolidated in Europe.

04 **Shipping**
Packing, export documents, tracked transport to destination.

05 **Installation**
Assembly by your teams, your partner or our network.

06 **Commissioning**
Adjustments and tests: the lift is ready.

European standards, adapted to your country

- **EN 81-20 and EN 81-50** : Construction and safety of new lifts, with certificate of conformity.
- **Directive 2014/33/EU** : The European framework for lifts and their safety components.
- **EN 81-70 and EN 81-28** : Accessibility, including for people with reduced mobility, and remote alarm linked to a rescue service.

IN FRANCE

Your lift project in France

Developers, social landlords, property managers, architects, companies: we support you from study to commissioning, with a single contact from start to finish.

Study and advice

Review of your drawings and building, choice of the most suitable equipment: with or without machine room, goods lift, escalator.

Bespoke design

Dimensions, load, speed, number of levels, car and finishes: each lift is designed for your project.

100% Sodimas supply

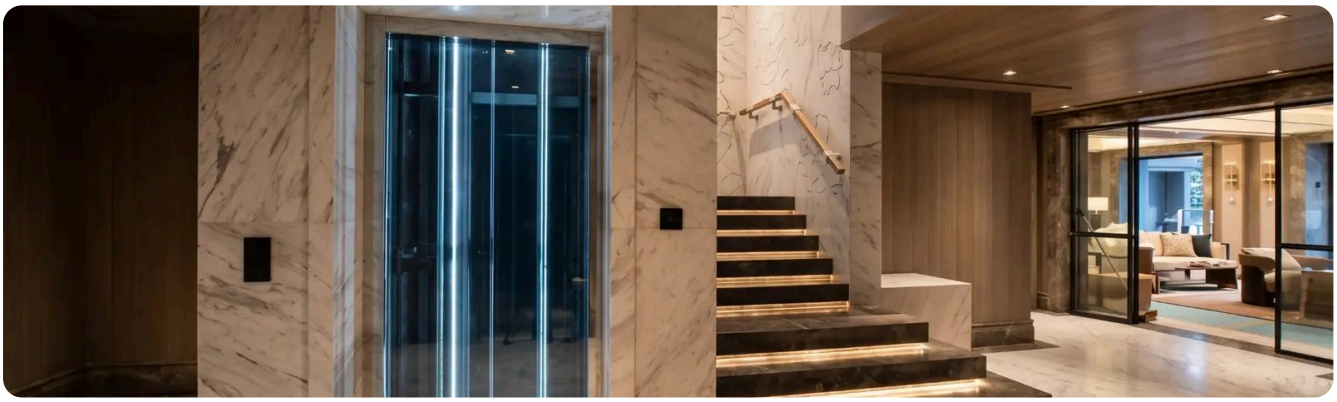

100% Sodimas lifts, from the French manufacturer: machine, QI Touch controller, safety and signalling.

Installation and commissioning

Assembly in the shaft, adjustments, tests and handover, compliant with EN 81-20 and EN 81-50.

Who is it for?

Residential buildings · Offices · Public buildings · Retail · Industrial buildings
